Roads Cost \$3,000.

A meeting of the Town Council was held on Monday night, those present including Mayor Chambers, Councillors Barrett, Berscht, Edwards, and Reiber, and Secretary Austin.

A discussion on roads revealed the fact that so far this season, about \$3000 had been spent on improvements, the Mayor remarking that he did not wish this figure to be exceeded.

The secretary stated that the Deputy Minister at Edmonton had promised to send down an engineer to inspect the work that had been done, after which arrangements would be made to supply gravel. This, it is expected, will be on a 50-50 basis.

Following the above, the Council then waded through, clause by clause, the proposed agreement of the Calgary Electric Light Co.

After some discussion, and several suggestions had been put forward, it was decided to hold the agreement over for a final interview with the company's officials, which probably will be within a couple of weeks.

School Fair a Big Success.

The school fair held at Community Hall on September 2nd was successful in every particular. Great interest was displayed in the event and competition was keen. The exhibits were splendid, quantity and quality both being above the average.

The prize list follows—

Class 1—1, Joyce Morgan; 2, Edward Walsh; 3, Ruby Snyder; 4, Clifford Shervey; 5, R. Finley; 6, Dorothy McCann.

Class 2—1, Joyce Morgan; 2, Molly Pearson; 3, Florence McNeil; 4, Gladys Haynes; 5, Howard Lyons; 6, Ronald Thomas.

Class 3—1, Evelyn Dickau; 2, Edith Pratt; 3, Isabel Pratt; 4, Jean Hunter; 5, Arnold Thurlow; 6, Reginald Avery.

Class 4—1, Kenneth Burns; 2, Edith Pratt; 3, David Pratt; 4, Tom Pearson; 5, Nola Finley; 6, Molly Pearson.

Class 5—1, Kenneth Burns; 2, R. Finley; 3, Theodore Hunter; 4, Edith Pratt; 5, Stanley Green; 6, Henry McCann.

Class 6—1, Henry Schaffer; 2, R. Finley; 3, Stanley Green; 4, Ronald Thomas; 5, Evelyn Dickau; 6, Everett Blain.

Class 7—1, Stanley Green; 2, Nola Finley; 3, Reginald Avery; 4, R. Finley; 5, David Pratt; 6, Everett Blain.

Class 8—1, Sarah Morasch; 2, Alton Snyder; 3, Alfred Snyder; 4, Edith Pratt; 5, Dorothy McCann; 6, Henry McCann.

Class 9—1, Evelyn Dickau; 2, Reginald Avery; 3, Everett Blain; 4, Henry Schaffer; 5, Danny Morasch.

Class 10—1, Reuben Schacer; 2, Katie Patterson.

Class 11—1, Molly Pearson; 2, Isabel Pratt; 3, Irene Haynes; 4, Tom Pearson; 5, Irene Snyder.

Class 12—1, David Pratt; 2, Iky Haynes; 3, Irene Haynes; 4, Gladys Haynes; 5, Molly Pearson.

Class 13—1, Iky Haynes; 2, Ronald Lyons; 3, Gladys Haynes; 4, Everett Blain; 5, Arnold Thurlow; 6, Kenneth Burns.

Class 14—1, Jessie MacColloch; 2, Reginald Avery; 3, Arthur Liesemer; 4, Arthur Snyder; 5, Alfred Snyder; 6, Edwin Schaffer.

Class 15—1, Jessie MacColloch; 2, Ronald Thomas; 3, Abe Dyck; 4, Alton

WORLD HAPPENINGS BRIEFLY TOLD

The honey harvest of Southern Alberta is expected to run to 300 tons, worth about \$100,000.

A remarkable and increasing demand for Canadian food products in Great Britain is reported by Major G. B. Johnson, Canadian Government trade commissioner for Glasgow.

Canada's net debt decreased by \$63,789,157 during the first five months of the present fiscal year which opened on April 1, according to the monthly financial statement issued by the Department of Finance.

A total of 543 commercial vessels passed through the Panama Canal during the month of August, this being a new record. The previous record was 509 transits, made in July, 1927.

All the inhabitants of Turkey, including foreigners, are to be confined to their homes for an entire day on October 28, according to official regulations issued at Constantinople, fixing that date for the national census.

The beam wireless service to India has been opened to public traffic. The Government program of 1923 for linking up the British Empire by wireless is now complete, beam communication to Canada, Australia and South Africa being already in operation.

It is reported that Japanese divers at Sebastopol, Crimea, who were searching for a half-a-million sterling in gold (\$2,500,000) aboard the British cruiser Black Prince, have discovered the first gold coin. The coin bears the inscription of George III. and the date 1821.

It is expected that within six weeks it will be known whether or not oil in commercial quantities is to be added to Northern Ontario's inventory of wealth, for by that time tests which the provincial Government has been conducting in the Mattagami Valley will be completed and a report upon them made.

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm Powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

Planes Replacing Dogs

With aeroplanes coming into use all over Alaska for freight transportation, dogs are being used less and less on the trails. Consequently, there is an over-supply and hundreds of huskies, abandoned, have reverted to the wild state and are becoming the most dangerous kind of marauders.

Air Base in Near East

Britain Planning One At Malta To
Protect Suez Canal

The British air ministry is said to be planning development of a great air base at Malta which will dominate the Eastern Mediterranean and will protect Egypt and the Suez Canal against attack.

This also is regarded as a precaution in view of Premier Mussolini's plan of developing a great military and naval base at Rhodes.

It is also learned that the Nizam of Hyderabad, who is one of the greatest semi-independent native princes, is planning to establish an air service in his dominion and is sending a number of young men of the leading families to be trained for air work in England. While of course, the service will be paid for out of the revenues of the Nizam, it will be co-ordinated with the imperial service in India.

France Raises Tariff On Canadian Wheat

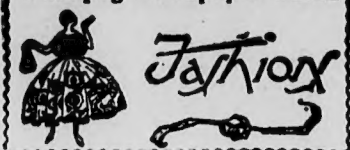

Notice Of Increase Has Been Received At Ottawa

France has increased the tariff on Canadian wheat from 20 cents to 27 cents, approximately, per bushel, according to official advices received from the Canadian Trade Commissioner in Paris. The higher rate comes into effect immediately.

While Canada's export of wheat to France has fluctuated from year to year, the present change on the basis of last year's export of 4,155,867 bushels will mean an increase in the total French duty collected on Canadian wheat of nearly \$250,000.

Canada, under the 1922 treaty between the two countries, enjoys a minimum tariff and most favored nations' treatment on exports to France and the increase now put into effect is due to the raising of the minimum tariff rate to all countries by France.

A Chic One-Piece Frock

Unusually smart is this modish one-piece frock of slenderizing lines. Contrasting material may be effectively used for the front panel, vestee, shield, long collar, and facings on the dart-fitted or loose sleeves. An inverted plait at each side seam provides for the necessary fullness, and the narrow belt fastens with a buckle. No. 1644 is in sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 38 requires 2 1/2 yards 39-inch, or 2 3/4 yards 54-inch material for the dress, and 3/4 yard 39-inch for collar, vestee, shield, panel and sleeve facings. Price 29 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

Minard's Liniment eased sore feet

If sometimes the tea you are using does not taste as good as it used to—just see what kind of a package it is in. No chances are taken with Red Rose. It is packed in clean, bright Aluminum.

Defies Alpine Climbers

Mount Robson Is Still Victor Over Mountaineers

Mount Robson, giant peak of the Canadian Rockies, this year has turned back every party of Alpinists who have attempted to scale it. Two recent attempts were made by members of the Seattle Mountaineers' Club, but they too met with failure.

A driving rain and low-lying clouds were encountered by the climbers on their dangerous ascent from the valley floor. At high altitude they ran into sleet and then, when the weather cleared, they waded waist-deep through snow. Finally, when success seemed almost certain, they brought up against a huge ice cliff blocking the only possible approach to the summit.

The cliff is 100 feet high and almost perpendicular. The climbers said they would try again next year.

Place For Garnet Wheat

New Variety Is Giving a Good Account Of Itself This Year

"Garnet wheat is giving a good account of itself this year," said L. H. Newman, Dominion cerealist. "The first carload of wheat delivered on western railway lines this year was Garnet," he declared, "and I am pleased to hear that the Demonstration Farm at Raymond cut Garnet wheat estimated to run 40 bushels to the acre, two weeks earlier than the average cutting." Mr. Newman made it plain that, although he had carried on the closing experiments which resulted in the production of Garnet, he was not making undue claims for it. He is still very strong for Marquis as the standard wheat, but believes there is an important place for the earlier-maturing Garnet.

Mothers Should Use

When The Babies Are Cutting Teeth

During the baby's teething time, in the hot summer months, the bowels become loose and diarrhoea, dysentery, colic, cramps and other bowel complaints manifest themselves; the gums become swollen, cankers form in the mouth, and in many cases the child wastes to a shadow, and very often the termination is fatal.

This is the time when the mother should use "Dr. Fowler's," and, perhaps, save the baby's life.

It has been on the market for the past 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

It isn't the cost of living that worries the man behind the bars.

SUNDAY SCHOOL LESSON

THE EARLY KINGS OF ISRAEL

Golden Text: "Jehovah hath established his throne in the heavens; and His kingdom ruleth over all."—Psalm 104:19.

Devotional Reading: Psalm 105:1-8.

A Review By Means Of Allusions

In the fullness of spirit Nathan spoke to David, and so in a hundred voices God through that goodly company of the prophet still speaks to us, and convinces us of our sin and of His presence.—Dean Stanley.

I dare not hope with David's harp to chase the evil spirits from the troubled breast.—Kebble.

We think of prayer for others as a privilege, but he regarded it as a duty; not to pray for his people was to him a sin.

"Latest born of Jesse's race,
Wonder lights thy bashful face,
While the prophet's gifted oil
Seals thee for a path of toil."

"Because you cannot gain
A wondrous Waterloo
In life's great battle, why remain
Unarmed with foes in view?"

Be not afraid, like David, take your sling,
And do some humble part in conquering.—Julia H. May.

And his next son, for wealth and wisdom famed,
The clouded ark of God, till then in tents
Wandering, shall in a glorious temple
Enshrine.—Milton.

If I am only an instrument of gathering materials and another shall build the house, I trust my joy will be none the less.—William Carey.

His life is the tragedy of a man capable of nobility of character and of great service, who gave loose reins to his evil temper till his only ambition was to hunt and kill "a partridge on a mountain."

It seems an almost impossible state of self-deception which could let him flare out in indignant virtue against the supposed culprit, and never once dream that the case could apply to himself.—Hugh Black.

Rub It In For Lame Back.—A brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

How Hospitals Care For Patients

Eight thousand hospitals in the United States and Canada take care of 12,000,000 patients a year or about 525,000 a day. It is estimated five billion dollars are invested in the hospital property and in the opinion of Dr. E. S. Gilmore, head of the American Hospital Association, it now is disgraceful or criminal to die under 75 years of age. Unfortunately many persons seem more or less reluctantly obliged to in spite of what hospitals can do for them.

Minard's Liniment relieves backache.

Air Patrol Covers Large Area

Approximately 165,000,000 acres of forest land in the provinces of Ontario, Manitoba, and Alberta were under a system of aerial protection during 1926.

Garrett: "Do you think a travelling man can go to Heaven?"

Mitchell: "Not if the Recording Angel audits their expense accounts!"

Treat Colds 2 Ways

With One
Treatment.
RUBBED on
throat and
chest, Vicks
does two things at once:

Naming Mountain Peaks

Mount Stanley Baldwin Is Named
After British Premier

Right Hon. Stanley Baldwin's name is to be perpetuated in Canada by a mountain peak called after him.

The geography board has acted on a suggestion of the British Columbia Government and a peak in the Rockies in that province with an altitude of 10,900 feet is to be called Mount Stanley Baldwin. It is visible from the railway through the Yellow Head Pass.

Other peaks in the same Cariboo range are to be named the Premier Group after Sir Wilfrid Laurier, Sir John Thompson, Sir John Abbott and Rt. Hon. Mackenzie Bowell. The Laurier Peak, 11,750 feet is the highest. Previously, mountains were named after Sir John A. Macdonald, Alexander MacKenzie, Sir Charles Tupper and Sir Robert Borden.

Just What He Wanted

A story is related of an old tenant farmer, who, on paying his rent, told his landlord that he wanted some timber to build a house, and would be much obliged if he would give him permission to cut down what would answer for the purpose.

"No!" said the landlord, sharply.

"Well, then, sir," the farmer went on, "will you give me enough to build a barn?"

"No."

"To make a gate, then?"

"Yes."

"That's all I wanted," said the farmer, "and more than I expected."

BURNS

Minard's soothes and reduces the inflammation. Keep it on hand for sprains, bruises and flesh wounds.

Giant Icebergs

Giant Icebergs, 400 feet high and eight miles in extent, were recently sighted by the master of the British Steamer Matatua, bound from New Zealand to Montevideo.

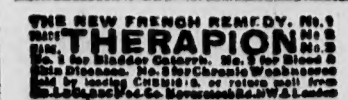

One day's exercise with a wood saw is worth two weeks of physical culture.

COPYRIGHT, CANADA, 1925

CHAPTER VIII.—Continued

The Wymuths were exactly the same type, — black-eyed, pale, anaemic, with lustreless thin, black hair, through which a bloodless scalp showed blotchily; false teeth—no, not false—everyone could see what they were — artificial, rather — so while they were almost blue. They believed in hell and spoke of the "world" in a tone which implied both horror and contempt. They knew that Christ was coming soon to take His own out of the world, leaving the other odd millions to their well-deserved punishment.

Mr. Wymuth satisfied the Board that he believed in discipline for wayward girls—discipline, repentance, and after that a life of meek and lowly spirit. "And," said Mr. Wymuth, "my wife will be guided by me entirely," at which Mrs. Wymuth bowed her head and drew her thin lips more tightly over her blue teeth.

The Board breathed more freely. "It will be better now," said Dr. Smythe, "and I think it would be well to have the pastors appeal to the ladies to have a series of teas to raise money for the additional salary. I am sure the ladies will take care of it."

It was to the Girls' Friendly Home (under the Wymuth rule) that Helmi finally was committed. If she had been of the full age of eighteen years she would have been sent to jail.

The police matron, a silent woman, who held her job because she was no talker, came with her on the car. Helmi, with her clothes in a little green valise which Miss Abbie had given her, walked confidently down the path which led to the big oak door. The police matron's flowers bloomed at each side of her. They nodded a welcome to her, and she felt reassured and comforted. It must be a nice home where there were so many flowers. Helmi had put on her pleated skirt and white middie, which now had the monogram on it, just like the other girls. She wore it today, be-

cause it had always brought her a good time and was full of the vibrations of fun and fellowship. The Blue and Gold Book was in her valise, and her English learning book, too. She would be all right, and Miss Rodgers would come, and the girls, too.

Helmi had not yet given up hope that Mrs. St. John would come to her aid when she was better. She still thought of her as she had last seen her, heavy-eyed, distressed, ill, and told herself over and over again that this was why her dear friend had not come to her. She was still too sick to know what had happened. Helmi liked to picture the scene. Her friend in her slinky gown of black silk, with her pearls, would come; she would be wearing her green velvet cloak, the one that looked just like the ocean foam that had gone cutting away from the boat in creamy suds when she crossed the ocean, and her black hat with the silver arrow; she would come driving up in her big car and talk to the people in big swanky English words, making her eyes go snap like she could when she wanted the Doctor to do something. Everyone always did what Mrs. St. John wanted, and she would be so mad that people had been mean to Helmi, and she would call them names, and stamp her foot, and maybe swear a little — just a few good ones. And then she would turn and say "Come, Helmi, my poor, brave child."

Oh! it would be sweet. As Helmi was the first case to be brought in since Mr. and Mrs. Wymuth came, the worthy couple were determined to show the Board the value of discipline. The history of the case had been given them. The girl had refused to tell why she was in the Chinese den.—It was evidently a stubborn case. Mr. and Mrs. Wymuth had dealt with stubborn cases before. The proud and forward spirit must be broken. And it could be. They were waiting eagerly for Helmi. The Board would expect results, and the Board would not be disappointed.

When the Police Matron and Helmi climbed the flight of stairs leading to the great front door and the bell was rung the lock was turned in the door and they were admitted into a dark hall. As they entered the door was shut again so promptly behind them that the corner of the Matron's cap was caught and had to be released. Then the big bolt shot into place, and in a whisper Mrs. Wymuth asked them to come this way, leading them down the hall to a gloomy room which she called her "Retreat." The door was shut and locked, and Helmi was told to sit down.

The Matron, living up to her reputation of being no talker, handed Helmi over with as much emotion as is shown by the fee man when he loosens his pliers from the square of ice and leaves it to drip its life out on your back step. His responsibility ceases when the step is reached.

"Good-bye, Helmi, be a good girl," she said, not without a degree of kindness. Her last delivery to the Girls' Friendly Home had pulled a handful of hair out of her not too well covered head! so she felt kindly to Helmi.

Helmi wrote her name in the brown book Mrs. Wymuth showed her, quite proud of the fine big letters she was able to make. She wrote her address "c/o Miss Abbie Moore, 52 Chestnut St."

Mrs. Wymuth admired her writing. "And you can English speak?" she asked sweetly, feeling that if she transposed the words they would be

more intelligible to the Finnish girl. "A little," said Helmi, smiling back. "You will learn more here," said Mrs. Wymuth: "all our good girls go to school. You like school?" Helmi nodded.

"Now, dear I want to be your friend. —I am a little mother to all the girls —I want you to tell me all about yourself."

Helmi told her about coming to Saint Paul—her aunt's death—her coming to Winnipeg—Miss Abbie Moore—the Girls' Club. Suddenly she stopped.

"Ye-e-e-s?" Mrs. Wymuth stretched the word out until it seemed like a sharpened pry which would be sure to lift another slab of conversation. "That is all," said Helmi.

"Who sent you for the medicine, dear?" asked Mrs. Wymuth casually. "I cannot tell," replied Helmi, looking her questioner straight in the eye.

"You mean you will not tell. Now, Helmi, trust me—I'm your little mother." She came over to the girl and laid her hand on her shoulder. Her touch made Helmi shiver, and when she bent nearer Helmi drew away from her.

"I will not tell," said Helmi again. Mrs. Wymuth drew her lips tightly over her two plates. "We'll see," she said, and Helmi knew it was a threat.

That night Helmi met the girls at supper. The table had been turned diagonally across the room to get greater length, and it had a clean cloth, although it was not Sunday; Mrs. Wymuth had expected a visit from some members of the Board.

"Now, girls," said Mrs. Wymuth, in her sweet way, after a lengthy blessing had been called down from on high, "we have a new girl, Helmi Milander. She has come to us for a while, and I want you to be very good to her, and very kind. Let her know she is among friends here. Helmi and I have had a little difference already, which I wish to tell you about. In order to help her I must know her whole story, and this she refuses to tell me. I have coaxed her, but she remains stubborn. Isn't she foolish, girls? I am here to help every girl, but the girls must let me. Isn't she foolish, girls?" she repeated.

"Yes, Mrs. Wymuth," said the girls in chorus. But they said it listlessly. Their days of mourning for the other matron were not ended.

Then Mrs. Wymuth proceeded to tell the story, the girls listening open-mouthed. A new girl's story was always interesting.

"Now we will all pray that Helmi's stubborn spirit may be melted. You will all pray, won't you girls?"

Helmi sat looking from one to the other helplessly. Had she not one friend anywhere?

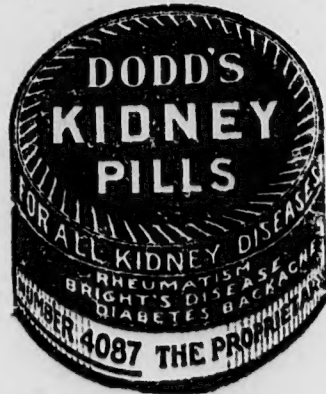

Every night after the evening meal there followed this orgy of prayers, when every girl who wanted to stand well with the matron prayed. Much of it was meaningless, but as the prayers went on a certain excitement laid hold on them, and in their supplications they forgot that other ears than God's were listening, and unconsciously they revealed many things. The Matron was hopeful that Helmi would be swept into the whirlpool of excitement, and would tell what she wanted to know. Helmi sat still and listened, but refused to pray.

(To Be Continued)

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

Testing Big Seaplane

The Westminster Gazette announces that the British ministry is trying out a 3-ton mile special seaplane development flight in the Baltic with a fleet of experimental flying boats as exhaustive tests for naval and commercial transport work. It is hoped, the Gazette adds, that the tests will involve huge all metal aerial battle-ships to act as the eyes of the fleet.

FLIT

Destroys Flies, Moths, Mosquitoes, Ants, Roaches, Bed Bugs

Dinner Sent By Air

Reno Rancher Ordered Sixty Plate Meal From San Francisco

The St. Francis Hotel at San Francisco received an order for a sixty-plate dinner to be delivered by aeroplane at the home of W. H. Moffit, cattle rancher near Reno, Nev. Arrangements were made by telephone from the Moffit ranch to forward the meal in an express aeroplane, with electric heaters to keep the food hot, a head waiter to superintend the serving, and two aviators properly attired to serve.

A DOCTOR'S PRAISE

A Noted Doctor Strongly Endorses Dr. Williams' Pink Pills

The test of any remedy lies in its acceptance and employment by the qualified medical practitioner. No less an authority than Dr. Andrea Amiel, physician to the Papal household, writing on the subject of anaemia, impoverishment of the nervous system and disorders attributable thereto, strongly endorses Dr. Williams' Pink Pills, recommending them as superior to other tonics.

Dr. Amiel's testimony reads as follows:—"For several years I have made use of Dr. Williams' Pink Pills in my work and I have always found them efficacious in the treatment of disorders due to impoverishment of the nervous system, anaemia, and neurasthenia, stomach weakness, retarded development in young women, and irregularities. There is no lack of tonic remedies, but in my experience no one of them manifests a superior efficacy to that of Dr. Williams' Pink Pills."

No more conclusive evidence of the value of Dr. Williams' Pink Pills could be asked for or given, than is found in the above endorsement of this noted European physician. Besides this, however, this medicine has enjoyed a world-wide public confidence for more than a third of a century and has brought relief to thousands and thousands of weak and suffering people.

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuralgia, nervousness and stomach trouble. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Little Helps For This Week

Let the word of Christ dwell in you richly in all wisdom. —Col. III. 16.

"Tis not the skill of human art Which gives me power my God to know: The sacred lessons of the heart Come not from instruments below: Love is my teacher."

—Madame Guyon

Every great teacher or leader lays stress on some single word of might, —the key, as it were, to his position. Buddha's great word was "renunciation." Zoroaster's, "purity." Menu's was "justice." The key to Confucius is "moderation." Moses emphasized "law." Plato, "harmony." Socrates, "reason." The strong word of Epicurus was "refrains." Antoninus, "self-possession." But Jesus gives us the key to the inner chamber of His heart in a single, mighty, sweet word, "love." —O. B. Frothingham.

Merely a Signature

A member of a congregation, becoming angry at a sermon the minister was preaching, wrote the single word, "Fool" on a sheet of paper, called an usher to him, and had it delivered to the minister in the middle of his sermon. The minister opened the paper and read what was written. Then he said: "An unusual thing has happened. A member of the congregation has signed his name without writing the letter."

Girls admire promising young men, but everybody else prefers those who pay cash.

Used by physicians—Minard's Liment.

New Home Ready

Prince Of Wales To Take Up Residence in Marlborough House

The Prince of Wales will go into residence at Marlborough House soon after his return from Canada.

Marlborough House, an almost square, solid red brick building, was built by Sir Christopher Wren just over 200 years ago for the first Duke of Marlborough. Later it became the residence successively of various members of the royal family, and finally was acquired for King Edward VII. then Prince of Wales.

The present Prince of Wales will actually use only a small portion of the house himself. His suite will be on the first floor, which looks out on two acres of garden. A large room, which was formerly an audience chamber, will be converted into a combined reading room and study where the Prince will conduct the principal part of his correspondence.

On the ground floor is a large room which will be used for the entertainment of friends who are not of the Prince's intimate circle.

Queen Alexandra's boudoir and bedroom will remain exactly as they were in her lifetime, as will also the four state rooms with their pictures and statuary. The same course was followed with regard to Queen Victoria. Rooms at Osborne House, Isle of Wight, where she died—although her death took place more than a quarter of a century ago and although Osborne House as a whole has been put to different uses—remain as they were in her lifetime.

Hard and soft corns both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

Was Interested In Photography

Queen Alexandra's interesting collection of photographs taken by herself has just been bound. Her late Majesty had a great gift of seizing a good picture, and would have made a name in this line were she born in a less exalted position. In the collection are pictures of every royalty in Europe, for more than half a century. Up to a few years before her death she kept up her interest in the camera.

Though unresponsive, as a rule, to natural beauty, Napoleon showed a marked preference for violets.

EXPECTANT MOTHERS

Read Mrs. Menard's Letter. Her Experience May Help

Chatham, Ontario.—"I want to tell you how much good your medicine has done me. Before my baby came I felt so weak and run-down that I could hardly do my work. My head ached continually and I was so discouraged that I could cry from morning till night. I had another baby just one year and a half old and it gave me a lot to do. So I thought I would try Lydia E. Pinkham's Vegetable Compound, as I had read so much about it in the little books. I found a difference right away as my head was relieved and my tired feelings gone. My sister had been doing my washing and she continued doing it, as she said it might set me back if I started to do it again. It sure did help me and I had taken just two bottles when my baby came. He is a fine big boy, now nearly five months old. I am taking your medicine again and I am able to do my work all by myself now. I always recommend the Vegetable Compound to women, and especially to expectant mothers, as I believe they need help at those times."

Mrs. OLIVER MENARD, 24 Harvey St., Chatham, Ontario.

COLDS COST MONEY

FORTIFY YOURSELF AGAINST THEM

It is estimated that a sufferer from colds loses three days' time from work in a year.

At work, in the "movie," or at any entertainment, if your neighbor has a cold and sneezes or coughs, the air is full of germs and if you are not in good condition, you may become ill. The only protection you can have is to build resistance against disease forces. Take that splendid herbal tonic,

DR. PIERCE'S GOLDEN MEDICAL DISCOVERY

It increases the appetite, stimulates the digestion, helps to enrich the blood and to improve the health generally.

Procure it from your druggist, in either liquid or tablet form. Write Dr. Pierce's Invalids' Hotel in Buffalo, N. Y., if you desire free medical advice.

LOCAL AND GENERAL

Mr. and Mrs. John Hawkes of New Brunswick are visiting their sons here for a few days, after which they go to various places of interest in Western Canada. Both Mr. and Mrs. Hawkes are over 70 years of age.

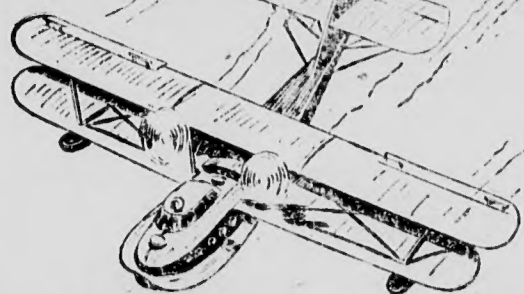

Mrs. W. Leadbetter accompanied her sister Mrs. Wells to Cochrane last week, and will stay there with her until the latter's departure for England.

Sousa's band at Calgary Tuesday

night attracted a large Didsbury contingent, including Mr. and

Miss Florence Reiber visiting

some day—

YOU, too, may fly to Paris!

A novelty today—but a commonplace tomorrow. And when the first passenger plane spans the Atlantic—what a triumph for Scientific Accuracy!

Scientific Accuracy! The factor which makes modern aviation possible is the same which makes Warm Air the world's most efficient heating system. Properly installed, a Warm Air Furnace gives better health, un-

failing comfort and great economy. But it MUST be properly installed. It MUST be scientifically accurate.

NOW—by adopting a Standard Code based on tried and proven scientific principles governing Warm Air installation, McClary's have raised Warm Air to a higher plane than that of any other heating system. Healthful heat at all hours, unfailing comfort, remarkable fuel economy—all these are guaranteed to every home owner using McClary's now "Code Installed" Sunshine Furnace.

McClary's are the only Canadian members of the National Warm Air Heating and Ventilating Association—a body of leading manufacturers who have adopted a scientific code for installing warm air furnaces. By insisting on a McClary's "Code Installed" Sunshine Furnace you are guaranteed the most healthful, efficient and economical heating plant your home can accommodate—at about half the cost of more elaborate yet less effective systems.

Fill in and mail attached coupon, and we will send you name of the nearest McClary's dealer who will guarantee a "Code Installed" heating system which gives lifetime satisfaction.

Fight the Fire Fiend

The week commencing October 9 has, by proclamation published in the Official Gazette at Ottawa, been declared Fire Prevention Week throughout Canada. The object is, of course, to focus public attention upon the enormous losses, both of life and property, resulting from fire with a view to the adoption of more effective safeguards against fire, and to educate all people, and especially children, against habits of carelessness in the handling of matches, gasoline and other combustibles, and in the disregard of common-sense methods in the matter of extinguishing camp fires, and such simple matters as throwing away the still lighted stubs of cigars and cigarettes.

At first glance it would seem to be quite unnecessary for the national government to officially set aside one week out of every fifty-two for the avowed purpose of teaching a presumably intelligent, educated and business-like people to safeguard their own lives, homes and property from destruction. Unfortunately, Canada's fire record proves conclusively that it is only too necessary to keep up a persistent campaign to awaken the people from their carelessness and indifference in this very vital matter.

Canada, which is so progressive in many ways, and has taken the leadership in numerous worthwhile movements, and can claim the honor of achievements, occupies a low place among the nations of the world when statistics of fire losses are studied. Few countries, if, indeed, any one, annually record the appalling fire losses which take place in Canada. This Dominion's fire loss per head of population is about the highest in the world, and the passing years do not reveal much improvement.

Canada has already sustained the loss not merely of millions but actually billions of dollars worth of forest wealth, some of which is gone forever, and where long periods of time will be required to make good the loss in other districts. And these forests are one of Canada's greatest assets, one of the principal factors today, and for the future, in building up the Dominion's greatest industrial enterprises and providing a very large percentage of the Dominion's export trade.

The fire fiend takes a yearly, monthly, almost daily toll of human life, as well as leaving behind it a trail of lifelong suffering and economic loss in blinded and crippled humanity.

Because of the high ratio of fire losses, the people of Canada have to pay abnormally high rates for fire insurance. The insurance companies are not to blame for demanding high premiums. They must protect themselves and their policy holders, and just so long as fires in Canada remain so numerous and costly, so long will the cost of insurance against fire remain a heavy drain upon the business of the Dominion.

Then, too, there is the further heavy burden imposed upon all urban communities in the maintenance of elaborate and expensive fire-fighting equipment, and large expenditures to augment water supplies for fire-fighting purposes greatly in excess of the daily domestic requirements of cities and towns.

All these forms of protection are necessary, and must be paid for in our tax bills. But because of the frequency of fires largely the result of carelessness and neglect of the most ordinary precautions on the part of many people, these services have to be maintained on a much more extensive and expensive scale than would otherwise be necessary.

Fire Prevention Week should, therefore, be observed all over the country, special attention should be paid to the subject in all schools, while each individual householder should devote a little time to a thorough examination of his premises and make a close check-up of conditions in and around all buildings. Rubbish should be cleared away, unprotected stove pipes, electric wires, gasoline and oil supplies attended to, and every member of the family cautioned to exercise the greatest care in handling of matches and all combustible materials, lighted lamps, and in the making and extinguishing of fires. Finally, all property should be adequately insured notwithstanding all precautions that may be taken.

Attention to these important matters now may save much loss and suffering in the future.

Giant Dirigible Damaged

Expansion Of Gas Through Weather Conditions Caused Peculiar Accident

A peculiar accident to the giant dirigible Los Angeles occurred while the huge airship was moored at her

moor in Lakehurst, N.J. The temperature rose suddenly, causing the helium gas in her containers to expand rapidly, and the wind added 180 degrees in a few seconds. The result was that the ship threw her stern high into the air, almost at an angle of ninety degrees, and whirled around with the sudden change in the wind. The temperature went back to normal rapidly, so that the gas, as it cooled, lost its normal volume and the tail of the ship dropped down. Meanwhile, however, loose gear in the ship was thrown about, causing some damage.

Japan Needs Post Offices

Government Is Considering Plans For Increase In Number

More post offices are needed in Japan. For each 6,700 persons in the country there is only one post office. England and Germany have one to 2,000 persons. The Communications Department is considering plans for the increase in the number of offices and an appropriation is to be included in next year's Budget for the opening of \$500 more post offices over a period extending ten years. At the end of ten years each village throughout Japan will have a post office all to itself.

Get Rid of HEMORRHOIDS (Piles)

Surgical operations for the relief of Piles can often be avoided by the use of Anusol Suppositories.

Your best assurance of their remedial effectiveness is the fact that Anusol Suppositories have a twenty-five years' record of success in the treatment of this painful condition.

Nothing injurious or habit-forming in the Anusol formula. Safe for people of every age. Sold only in red SEALED boxes.

Ask your druggist or write us for a dozen, postpaid, for \$1.50. Canadian & Foreign Agency Company, Unity Building, Montreal.

ANUSOL SUPPOSITORIES

Canada Favored For League Seat

London Paper Says Dominion Well Qualified For Seat On Council

The London Observer, commenting on Canada's candidacy for a seat on the League Council, says it would be hard to pick another candidate more powerfully qualified for the privilege. The great war was warrant enough of Canada's capacity for international service and she has played other parts since then.

In numbers and influence taken together, continues the Observer, Canada ranks high in the list of candidates, and above all, it would be invaluable for the league to have for the first time a direct representative from North America upon the council.

Toes Kept Free From Sore Corns

When you notice any sign of callous on the feet or toes—that's the time to paint on a few drops of Putnam's Corn Extractor. Do this, and you prevent corns. No matter if the corn is hard or soft. Let it be on top or between the toes. Putnam's will remove it without pain. Insist on "Putnam's" Corn Extractor. It does the work—and roots out the corn.

Self-Sustaining Air Services

Probably the only two self-sustaining air transport routes operated during 1928 in the Empire were in Canada—those from Halleybury to the Rouyn, and from Sioux Lookout to the Red Lake mining fields. These are on an absolutely commercial basis, and have had no Government subsidies.

A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should Be In Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which regulate the bowels, sweeten the stomach, drive out constipation and indigestion; break up colds and simple fevers and promote healthful refreshing sleep. It is impossible for Baby's Own Tablets to harm even the new-born babe, as they are absolutely guaranteed free from opiates or any other injurious drug.

Concerning the Tablets, Mrs. Alex. J. Perry, Atlantic, N.S., writes:—"I always keep Baby's Own Tablets in the house for the children, as I have found them a perfect medicine for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Coal Not Merely a Fuel

German Scientists Discover Many Valuable By Products

European scientists appreciate that "coal is not merely a fuel but contains raw products to make things out of," declared Dr. Thomas S. Baker, president of Carnegie Institute of Technology, upon his return from a trip abroad.

Coal's potentialities are particularly appreciated in Germany, according to Dr. Baker, where "there has been a most striking development in synthetic fertilizers in connection with coal—the outgrowth of the fixed nitrogen process developed during the war. It is a matter of very great economic force to the country and farm productivity has been materially increased."

"A great deal of the enormous success that the German Chemical Trust is having centres around the chemistry of coal," Dr. Baker said.

"While Germany has lost its monopoly of dyes, it is developing other processes that are of great importance to modern industry. This trust is said to be producing synthetic gasoline on a commercial basis."

It Will Prevent Ulcerated Throat.

At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

The oldest university in the world is that at Pavia in Italy, founded in 825 A.D. by Lothair, grandson of Charlemagne.

Drives away pain — Minard's Liniment.

W. N. U. 1699

Cuticura Soap Shampoos Keep the Scalp Healthy

Regular shampoos with a suds of Cuticura Soap and hot water, preceded by light applications of Cuticura Ointment, are most effective. They do much to cleanse the scalp of dandruff, allay irritation, stimulate circulation and promote the healthy condition necessary to a luxuriant growth of hair.

Sample Each Free by Mail. Address: Canadian Depot, "Stanhope, Ltd., Montreal." Price, Soap 25c, Ointment 25c and 50c, Talcum 25c. Cuticura Shaving Stick 25c.

French Use Bicycles

Report Shows They Out-Number Automobiles Ten-To-One

The number of bicycles in use in France in 1925 amounted to 7,112,900, an increase of 5 per cent. over 1925, according to Trade Commissioner Louie Hall, Paris, in a report to the Detroit office of the Department of Commerce.

About half a million bicycles are now used in Greater Paris, the Department of the Seine having 476,665 registered, or two to every eight inhabitants. In the highly industrial departments of Northern France, a total of 856,000 bicycles are in use, or one to every five inhabitants. There are 10 times as many bicycles in France as automobiles.

Asthma is Torture. No one who hasn't gasped for breath in the power of asthma knows what such suffering is. Thousands do know, however, from experience how immeasurable is the relief provided by that marvelous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

Will Plead Law Cases In European Courts

American Woman Attorney Going To Paris, Athens and London

An American woman attorney will try cases in Paris, Athens and London while on a "vacation." She is Miss Grace H. Brown of Detroit, who plans to sail to Europe soon to carry out her legal plans. In Paris Miss Brown will represent an Armenian claiming \$500,000 from the Turkish Government for land he alleges was confiscated. She has been retained in an immigration case in Athens and an involved estate will claim her attention in the London courts. Miss Brown has received introductory letters to the foreign courts from Secretary of State Frank B. Kellogg.

Some men waste a lot of valuable time explaining their actions.

Radio is Better with Battery Power

Ever since the inception of radio, batteries have been the accepted source of power. Pure DC current without hum or surge and correct voltage for all tubes and varying conditions are most conveniently and economically obtained today as in former years with batteries.

A, B & C BATTERIES

made by Eveready are the choice of radio users everywhere. There is an Eveready radio battery for every radio need. Your dealer recommends and sells Eveready Radio Batteries. Consult him about the correct batteries for your particular set.

TAKE MEANS TO PUT AN END TO CUSTOMS FRAUDS

Ottawa. — "We have had some evidence brought before us to indicate that in certain quarters there would be a revival of illegal practices once our commission ceased to exist. For the benefit of such parties and others similarly disposed I think I can promise that other means will be devised and rigidly enforced for detecting such frauds, and that for the future when such frauds and illegal practices are discovered, they will be visited with swift and relentless punishment."

The above was one of the statements made by Chief Commissioner J. T. Brown, of the Royal Customs Commission, in a brief address at the close of the public sittings of the commission here.

"No doubt there have been some who have been guilty of defrauding the Crown of its just revenues and who have escaped the scrutiny of our investigators," he continued. "For such let me say that the mere fact that they have thus far escaped exposure and prosecution must not be taken as any assurance that such practices can be continued with impunity."

The chief commissioner's closing address, which was concurred in by his fellow commissioners, W. H. Wright and Ernest Roy, expressed sincere appreciation of the work done by counsel, auditors and others associated with the work of the commission during the many months of the inquiry. Irrespective of the report which would be prepared and submitted to the Governor-in-Council, the investigation had been worth while, said the chief commissioner.

"Two things above all appear to have been necessary under the circumstances," he said. "In the first place, an exposure of conditions as they actually existed both inside and outside the service, with an awakened and enlightened public conscience on customs matters as a result. The work of the parliamentary committee and our commission has made the exposure fairly complete. In the second place, it is essential to have a head to the department with the ability, will and determination to bring about the necessary reforms. There is every indication that the present head of the department is such a man."

Projected Flight Cancelled

American Globe Circling Tour To End At Tokio

Tokio. — The projected flight of the American monoplane *Pride of Detroit* across the Pacific on its globe-circling tour was called off here by its copilot, Edward F. Schlee and William S. Brock.

The decision to call off the flight followed a lengthy conference with aviation experts here and others interested in the undertaking. Many cablegrams from America urging the fliers to stop at Tokio also carried weight. Brock and Schlee finally concluded the attempt to negotiate the Pacific would be suicide.

They will take an early boat for the United States and have their monoplane shipped home.

Should Lead the Way

Geneva, Switzerland. — The United States, France, Germany, Japan, Holland and the other drug manufacturing or producing countries should lead the way in curtailing the output of narcotics in the opinion of Colonel Daniel W. MacCormack, of Boston, technical adviser of the Persian government, as expressed on behalf of Persia before the League of Nations social welfare committee.

Farmer Killed By Airplane

Portsmouth, Ohio. — When a passenger aeroplane, just taking off from a new airport, struck his farm wagon here, Norman Hopkins, 26, farmer, was killed. Hopkins' two sons, Glen, 6, and Oscar, 9, who were riding in the wagon, were injured.

Next Meeting At Edmonton

Saint John, N.B. — Edmonton, Alta., was chosen for the next annual meeting at the close of the ninth annual meeting of the Associated Workmen's Compensation Boards of Canada here. J. Sterling, of that city, was elected vice-president.

Fast Steamer 'Plane Service Is Planned

Would Cross From New York To France In Four Days

New York. — The New York Herald-Tribune says that plans are nearly completed to launch an all-American combination steamship-aeroplane service between Montauk Point, Long Island, Plymouth, England, and Havre, France, with fast ocean liners that will make the crossing in four days.

The proposed line is to be incorporated as the New York, London, Paris Steamship Company, and will operate a fleet of ten 20,000 ton liners. The ships, which will resemble United States naval destroyers but about twice their size, will be driven at an average speed of 31½ knots, but capable of attaining 35 knots. They will be about 800 feet long with an 80-foot beam and a draft of 24 feet 9 inches.

The new liners, to be used exclusively for passengers, will carry 400 first class, who will be accommodated in small cabins, slightly larger than Pullman car drawing rooms.

Exodus Not Serious

Only Ten Per Cent. Of University Graduates Go To States

Winnipeg. — The exodus of Canadian university graduates to the United States is not as serious as it is held to be in some quarters, according to Sir Robert A. Falconer, president of Toronto University, in an interview here.

"I went into the matter quite carefully at one time," Sir Robert said, "and I found that, according to figures I got from various universities in Canada, the emigration of graduates did not exceed 10 per cent." Sir Robert added that this exodus "is not such a terrible thing as some people imagine; it supplies an outlet for our graduates." No one, he said, would bother to obtain a university education if they did not get the opportunity to use it.

Woman Drowned At Sea

Carried Over Side Of British Liner By Huge Wave

Philadelphia. — Mrs. Cyril H. Mumford, 30, of Fair Acres Farm, near Hamilton, Ontario, was swept overboard from the deck of the British liner *London Mariner*, while the vessel was en route from England to this city.

The tragedy was revealed when the vessel docked here, bringing a tale of a stormy voyage and the husband and three children of the woman.

Mr. Mumford, a former British army officer, was returning with his family from a tour of England, Scotland and France when Mrs. Mumford, who had been on an upper deck of the vessel, was carried over the side by a huge wave.

Typhoon Devastates Japan

Four Hundred Dead and Many Injured By Tidal Wave

Tokio. — Four hundred persons are dead, 2,300 injured, and 700 houses destroyed in Kumamoto, island of Kiusiu, in consequence of the typhoon and tidal wave, according to reports to the Japanese home office.

In Fukuoka, Nagasaki, and Kanagawa prefectures there were few casualties, but numerous houses were inundated and damaged.

When the typhoon struck Tokio several thousand houses in the low-lying sections were flooded. Thirty children were injured when the roof of a schoolhouse was blown off.

Liable To Dumping Duty

New Ruling On Imported Apples Has Been Issued

Ottawa. — Imported apples have been declared liable to dumping duty. A ruling issued by the Department of National Revenue holds that apples are to be considered as of a class or kind produced in Canada until otherwise ordered.

This means that a special (or dumping duty) in addition to the regular duty, will be applied to imported apples. The dumping duty will be the difference between the appraised value and the purchase price but not exceeding 15 per cent. of the appraised value.

For Outpost Work

Miss B. R. Terry, R.N., Toronto, Ontario, nurse, left recently to begin work at the new medical outpost, All Saints' hospital, Aklayik, North West Territory, which has been opened under the auspices of the Mackenzie River diocese of the Anglican church.

POSTAL DEFICIT MUCH SMALLER THAN EXPECTED

Ottawa. — Reduction of postage rates provided by the budget of 1926 has resulted in a deficit in the Post Office Department, but it is about a million dollars less than was originally estimated.

For the fiscal year which ended March 31 last, the returns are being made up and the deficit is placed at \$1,000,000. The estimated shortage was about \$2,500,000.

It would appear from these figures that the reduction in the letter postage from three to two cents per ounce has increased the volume of letters passing through the mails.

Simultaneously, a marked increase in the parcels post is recorded and a big business is being done. Despite the one-third cut in the letter rate the result of the operations under the new conditions leads to the belief that in a year or two at least equilibrium will be established between postal revenues and expenditures.

More Settlers For Lethbridge

Lethbridge. — The Canada Colonization Association has been so successful in the Lethbridge district that it has been decided to place another 25 families there this fall. One of the present settlers has placed 120 acres in sugar beets, 58 acres in potatoes and 400 acres in wheat and other small grains from which his returns this fall should be close to \$15,000. There are eight families now working for him.

Sittings Of Railway Commission

Ottawa. — The Board of Railway Commissioners announced the following dates for sittings in Western Canada: Saskatoon, Oct. 19; Edmonton, Oct. 12; Vancouver, Oct. 19; Victoria, Oct. 22; Nelson, Oct. 24; Lethbridge, Oct. 27; Calgary, Oct. 28; Regina, Oct. 31; Brandon, Nov. 1; Winnipeg, Nov. 9; Fort William, Nov. 5.

Indian-Paleface Romance

This little lady is evidently attracted to the small Indian boy and perhaps even more to the gorgeous and unusual house he lives in—a typical Stony Indian Teepee. So she has mastered her shyness and is tempting him with a few candies. The little Chief is nothing loath to be tempted and meets her more than halfway. This pretty little incident occurred during the great Indian Day Celebrations at the Banff Springs Hotel recently and was duly registered by a C.P.R. photographer.

Good-Will Between Canada and U.S.

No Room For Distrust Says Hon. William Phillips

Ottawa. — There is no place for distrust or misgivings between Canada and the United States, declared Hon. William Phillips, U.S. minister to Canada, in the course of a stirring address to members of the Canadian Club, and delegates to the annual conference of the Association of Canada.

"It is an easy matter for us to understand one another," he said, "because our interests touch at some points and because already we are thoroughly well acquainted. We are in no sense foreigners to each other, yet we still have much to learn, one from the other. Already we have gone a long way on the road toward mutual co-operation but we still can go even further."

"Much of the sorrows and sufferings of the world would have been avoided in the past if nations had only found the courage to approach their international problems in an attitude of reasonableness and fair play."

"With diplomatic reasonings—With diplomatic relations now established and with good-will manifest everywhere, Canada and the U.S. are ready, I hope, to discuss all questions of mutual concern, as they arise, cheerfully and frankly, and in a spirit of helpfulness. In so doing we shall become the happiest illustration of what we hope civilization has in store for the entire world. For between our two countries there is no place for distrust or misgivings."

Victim Of Experiment

Scientist Meets Death While Testing Effect Of Anaesthetic

Manchester, Eng. — A victim of his own scientific zeal, Dr. Disney-Rawson Wilson, surgeon and anaesthetist with a British and American reputation, was found dead in his laboratory. His wife discovered the experimenter with a mask over his face before a machine which administered gas mixtures.

It had been Dr. Wilson's great ambition to obtain and prolong the analgesic state, which is obtained momentarily when a person under an anaesthetic loses feeling yet retains consciousness.

Dr. Wilson's brother said the doctor believed he had sufficient will power to prevent himself from losing consciousness completely. Colleagues are of the belief that he met death experimenting on himself to discover the actual effects of an anaesthetic, which it was his conviction was the only way to obtain essential data.

Insured For Millions

187 Persons In U.S. and Canada Carry Heavy Policies

The lives of 187 persons residing in Canada and the United States are worth \$1,000,000 or more each to insurance companies, according to a survey made public by the Spectator Company, of New York.

Rodman Wanamaker, merchant heads the list with \$7,500,000 in policies. Several persons including Dr. F. G. Banting, of Toronto, discoverer of insulin, are insured for \$5,000,000 each.

REQUIRE MORE TRADE ROUTES FOR THE WEST

Vancouver. — "If Canada is to achieve her proper destiny as a great nation, the people of all sections of the country must realize that new trade routes must be established and hardy new settlers, no matter what their nationality, be brought in to develop the vast wealth stored in the great northern hinterland," Premier James G. Gardiner of Saskatchewan declared in an address before the Canadian Chamber of Commerce Convention here.

"All Canadians must get a vision of what the 20th century has in store for us, then put our shoulders to the wheel and push on to the destiny that is ours," said the Premier of Saskatchewan, 25 years ago a penniless homesteader from Ontario, thrilling his 200 auditors with his picture of the Canada to come.

"The most disconcerting question which can be introduced into discussions, national or international, is the proposal to change trade routes," Premier Gardiner pointed out. "Some of the greatest wars in history have been fought on that issue. I would say to those interested in opening the Pacific route—and why should it not be opened?—to those interested in opening the Hudson's Bay route, do not expect that those now operating on the established trade routes are going to admit lightly that new routes will not operate to their disadvantage or even should they do so that their opening will redound to the national interest."

Railway development in Canada was a thing of the future, not of the past, despite the great lines already constructed, Mr. Gardiner believed.

Seven-eighths of all wheat entering into international trade was produced in Canada at the present time, he said. This meant, he explained, that the prairie provinces with a population of less than 2,000,000 were feeding 40,000,000 in other countries. Yet only one-third of the land capable of producing grain had been brought under cultivation so far.

When the great remaining open spaces were populated there would be more than enough business to keep every port in the country busy for every month it could remain open, he predicted, and Vancouver, ice-free all year and sole outlet for a great producing region, would be one of the greatest commercial centres in the Dominion.

Proposals To Outlaw War

New Idea Presented To League By Norway Delegate

Geneva. — A "voluntary universal arbitration" pact was introduced at a session of the League of Nations assembly commission on disarmament by Dr. F. Nansen, of Norway. The pact created tremendous interest as a concrete development of the movement to outlaw war.

The pact makes all war between signatories impossible by arranging settlement by an arbitration board of all conflicts which are not handled by the World Court or are not solved by the Council of the League of Nations.

Flee From Earthquake Area

Tourists Along Black Sea Coast Crowd All Transports

Moscow. — Thousands of panic-stricken tourists along the Black Sea coast were crowding all means of transportation in order to escape from the district which has been shaken by earthquakes in the past few days, causing death and injury in many districts. Late reports from Yalta say that 13 persons have been killed there and 358 injured. Slighter shocks were still continuing in the region, the advices said. Relief measures are under way.

Royal Brothers Arrive Home

Southampton, Eng. — The Prince of Wales, looking very bronzed and fit and in excellent spirits, stepped ashore from the Empress of Scotland here, ending his trip to Canada. He was accompanied by Prince George. The Mayor of Southampton and other city and county officials welcomed the two princes, who immediately boarded the train to London.

Church Announcements

EVANGELICAL NOTES.

At the Communion service last Sunday morning four new communicants were received into church membership by letter. The church extends the hand of Christian fellowship and welcome to them.

Last Friday evening the parsonage was the scene of a full house at a "fellowship supper" in honor of the members of the official board (husbands and wives) of the Didsbury circuit. Table covers were laid for 32 guests. The supper was followed by four or five short speeches of a happy and humorous nature, all given in a very free and easy style. The official members then retired from the dining room to the parlor for a quarterly conference business meeting.

Mr. Otto Klein (widower) and Mrs. Lousia Suderman (widow) were united in marriage at the Ev. parsonage on Saturday evening. Twelve close friends were in attendance with them. Mr. Wilfred Klein, son of the groom, and Miss Louise Suderman, daughter of the bride, acted as groomsmen and bridesmaids. Immediately after the ceremony the bridal party was ushered over to Mr. Harry Gabel's next door to the parsonage, where they were met by a host of well wishing friends and relatives. Here a generous shower of rice, and other good and useful things were given them to bespeak the good wishes of their many friends, for a happy and prosperous wedded life.

KNOX and WESTCOTT

This Sunday is being observed as Rally Day where the Sunday schools are not closed. As soon as the ban is lifted we will observe Rally Day, and attempt to make up for lost time.

The attendance at church is increasing and the minister is making a real effort to make the services such that you feel you must attend. This Sunday the theme chosen is "The power of sympathy".

Lone Pine Hall—We want everybody there, Sunday, September 25th, for the three p.m. services.

Community Hall—Harvest home services were observed on the 18th. The weather was delightful, the decorations were fitting, the theme appropriate, and the largest attendance this year was recorded.

ST. CYPRIAN'S

(Church of England) -- Priest-in-charge, Rev. H. Clay, Box 157, Olds.

First Sunday in the month—Afternoon at 3.00 p.m.

Third Sunday in month—Morning at 11.00 a.m.

School is held every Sunday.

LUTHERAN CHURCH

Services for Sunday, September 25th—Westcott, 10.30 German, 8.0 English. Didsbury, 2.30 German.

In the German services the pastor will speak on "The opposition of the world against Christ and His followers" (John 15:17-25). While "The Unjust Judge" spoken of in Luke 18 will be the subject of the English address in the evening. Hopes are entertained that in spite of the busy season, both services may be well attended.

A Correction.

In our advt. of last week it was remarked that "electric lights were unreliable." When this remark was made it was not intended to cast any reflection upon the Town Council, the management of the electric light plant, or the plant in general. As a matter of fact, it is common knowledge that the trouble with the light has resulted from electric storms.

We just wished to advertise that we sell coal oil. A lamp with a little coal oil around the house is very convenient at times. J. R. MILLER

Wife Takes Vinol Feels Fine Now

"I was weak and had no strength. Since taking Vinol, I feel fine now and do my work again."—Mrs. G. Barnesberger. The very FIRST week you take Vinol, you begin to feel stronger, eat and sleep better. Vinol is a simple, strengthening iron and cod liver compound in use for over 25 years by weak, nervous women, run-down men and sickly children. (H. W. Chambers, Druggist.)

Local industries deserve local support. No need to send your printing outside.

Here and There

Four ships, arriving at Vancouver within one week, brought more than \$20,000,000 worth of silk from the Orient, for trans-shipment to New York. This is the heaviest movement of its kind on record along this coast.

The Canada Colonization Association, a subsidiary of the Canadian Pacific Railway for the settlement of privately-owned lands in Western Canada, in the first six months of 1927 accounted for the placement of 401 families on 97,944 acres of land.

The first passenger trip of the Lethbridge Commercial Airways was made on August 7th, between High River and Lethbridge by a plane piloted by Jock Palmer. It is announced that commercial flights will be arranged between Lethbridge and Waterton Lakes.

Already the muskrat has come to lead all other furbearers of the Dominion in the total value of peltry sold, not alone by reason of the great number of pelts taken, but on account of the remarkable rise in the price of the furs. In the olden days furs sold in London for a few cents apiece and in even more recent times.

An official announcement has been made to the effect that the Canadian Pacific Railway Company will construct a line from Midland to Port McNicoll. Public parades and demonstrations were held in Midland when the announcement was made as the citizens feel that the new line will mean a great deal in building up manufacturing and industrial concerns there.

Irene Castle, formerly well-known dancer, and wife of the owner of the Chicago Black Hawks hockey team, has recently been staying at the Canadian Pacific Railway hotel, the Algonquin, with her little daughter. They attended the Charlotte County Cottage Crafts exhibition pageant which is held at St. Andrews every year. Rustic dancing and folksong featured at the pageant.

Recent changes in the department of Natural Resources of the Canadian Pacific Railway have been effected. P. L. Naismith who has been manager of that office since 1912 tendered his resignation, whereupon Mr. S. G. Porter will officiate as manager. Mr. Naismith will, however, retain his position as chairman of the Advisory Committee, which he has held for the past two years.
